

How reaches less Energy less Costs?

Energysaving made easy

Ambitious climate protection laws are designed to 2020 to increase energy efficiency in German buildings up to 20%.

Espacially enterprises can strengthen their competitive edge due to lower energy cost.

Suggestions for
potential savings

During a site visit we find possible energy weak spots or facilities in your company or building. Based on existing datas we create a first report to give you an overview about:

Current situation | demand | potentials | opportunities

We create an energy analysis with a concrete action plan with the aim to treat the biggest vulnerabilities and potentials.

Costs of energy | review | vulnerabilities | priorities for efficiency

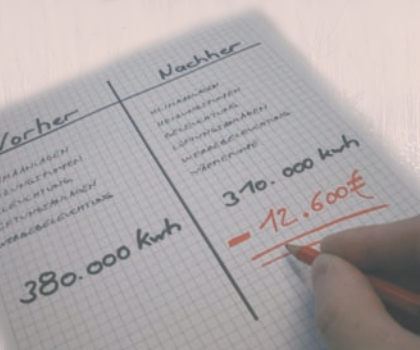

The Zebtec™ - advantage

More than 24 years of professional experience in system engineering lets us be the real HVAC-experts for all Energy efficiency measures

- Ventilation
- Refrigeration & Air Con
- Digital controls
- Sanitary

Zebtec™ - The MEP-Experts.

Just order today.

Zebtec™ - The MEP experts.

Zebtec™ has got references at various chemical sites in Europe. Successful creation of optimization proposals.

Energy consumption and CO2 savings were presented by Zebtec™ as savings comparison before and after.

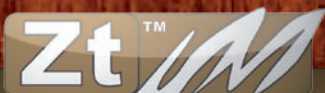

- **Drinking water facilities**
- **Ventilation and Air Con**
- **Central heating**
- **Chillers or Cooling water**
- **BMS-Technology**
